Description

Introduction

Crew Leader is a certification and qualification tracker that will track of current progress and keep track of timelines for items that require recertification.

Features

The interface offers the user a central panel from which they can quickly monitor the status of all certifications and tasks associated with them.

The user has the ability to enter in completion dates and durations of their certifications. This will better assist the user in keeping ahead of deadlines and better plan their schedules.

Focus Audience

Crew Leader was created by individuals in public safety to help with the multitude of certifications that they have maintain along with their normal hectic schedules. That being said, Crew Leader can help anyone that could benefit from an application centered around tracking qualifications and certifications.

I would like to give you a backstage pass to my imagination. It's good for everyone to understand that they are to love their enemies, simply because your enemies show you things about yourself you need to change. So in actuality enemies are friends in reverse. -Busy Ipsum

18 DEC 13	Finish app. begin final tests.
20 DEC 13	Double check, submit final.

Optional Features

Dashboard

The main body will have a dashboard to indicate a breakdown of all certification and task priorities.

Sortability

Tabs will be drag / droppable for user preference. Individual item listings will be contained within an accordian style menu and will expand upon clicking to show details.

Tracking

User can input completion date and duration of a certification and will generate an urgent priority when re-certification is becoming critically close.
